

DELIVER BETTER VIDEO EXPERIENCES
Broadcast-quality Video Delivery and Live Broadcasting

VIDEO PLUS & SECURITY PACKAGES

For BitGravity customers that want a Flash player, interactive capabilities, raw log access, security, and more, we offer video and security packages that integrate seamlessly with our network.

VIDEO PLUS PACKAGE

Our Video Plus package provides advanced functionality specifically for Flash and H.264 encoded files, including a Flash player, DVR-like capabilities, bitrate throttling, and more.

Video Plus Package Features:

- Flash Player with support for Advanced Progressive
 - Advanced Progressive:
 1. Includes the ability for end users to:
 - skip without downloading
 - jump between quality levels
 - jump between clips
 2. API allows customers to provide support in their Flash players so end users can create start and stop points of content and share the clips with friends
- Rate throttling: Control your users' stream to a specific rate

Internet and require a single click of the mouse to copy content. Ripping technologies either pull content from cache or tap in and copy streams. The security options eliminate content caching, prevent the copying of streams, and limit access to content.

SecureAccess™

SecureAccess limits users' access to content based on expiry time, geo blocking, IP address, URL, browser type, cookies, and other parameters. Unlike other solutions, each SecureAccess client gets multiple unique keys for maximum protection.

SecureAccess™ Features

- Support for access limitation based on customer-selected parameters
- Parameters can be used individually or in combination with one or more
- Works in conjunction with custom docroots
- Multiple unique keys for each client

SECURITY PACKAGE

We offer a security option that protects copyrighted content from the growing number of pirating technologies without disruption to the customer experience. Technologies that enable users to copy files and streams from the Internet without permission have become readily available, making it difficult for media companies to prevent the theft and posting of their property on Web sites. Progressive downloads and streaming media are susceptible to pirating with tools that are free on the
